## DETAILED ACTION

Claims 1-11 are canceled from the response filed on 01/04/06.

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 12-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-10 of U.S. Patent No. 6,678,145. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Regarding claim 2 (including all of the limitation of claim 1) of the U.S. Patent No. 6,678,145 recites a wiring connection structure (column 14, line 4) comprising all of the

elements of as claimed in claim 12 of the instant application. Therefore, claim 2 of the U.S. Patent No. 6,678,145 meets all the limitations of claim 12 of the instant claim.

Claims 3-10 of the U.S. Patent No. 6,678,145 meets all the limitations of claims 13-15 of the instant application (column 14, line 42 through column 15, line 5).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 12-20 have been considered but are moot in view of the new ground(s) of rejection.

*It should properly indicate that the claims are allowable over the prior art of record and would be allowed if a proper terminal disclaimer filed.*
